

**TOGETHER FOR A
SUSTAINABLE FUTURE**

TOGETHER FOR CLIMATE PROTECTION: THE FINANCIAL CLIMATE CONTRIBUTION

Since December 2017, in collaboration with ClimatePartner, a leading provider of climate protection solutions, we have been offering you the opportunity to offset the CO₂ emissions generated by your orders with a financial climate contribution. You are supporting an internationally recognized climate protection project.

How does it work?

You can optionally add a financial climate contribution to your orders. This option is available for many of our products.

Calculate CO₂

We have recorded the CO₂ emissions of our production - from the materials used to the production process and logistics. These emissions have been reduced as much as possible so that we can now accurately calculate the CO₂ emissions of individual packaging productions.

Offset CO₂

Support an internationally recognized climate protection project that reduces CO₂, for example through reforestation or innovative technologies. Your support offsets the CO₂ emissions of your order. All projects are certified to the highest international standards, so you can be sure that the measures are being implemented effectively.

Tracking CO₂ offsetting

You will receive a label with an individual ID number that guarantees complete transparency. Enter this ID at www.climatepartner.com to see exactly how much CO₂ your packaging has generated and which climate protection project you have supported.

Support projects worldwide

Choose from a wide range of climate protection projects, from forest protection projects in Germany to wind energy projects in India and water treatment projects in Africa. The details are discussed individually when the order is placed.

Costs

The climate contribution is 1% of the total turnover of your order, but at least €25. In the case of special projects, pricing is by arrangement.

Your promotional bags are declared with the "climate contribution" label

Your benefits at a glance:

- ✓ **Active contribution to climate protection:** Support recognized climate protection projects worldwide.
- ✓ **Demonstrate sustainability:** With the label on your packaging, you make a visible commitment to climate protection.
- ✓ **Maximum transparency:** Track and communicate the CO₂ offset of your order using the ID number.
- ✓ **Trustworthy projects:** ClimatePartner only works with projects certified to international standards. The TÜV Austria-certified process guarantees additional security.
- ✓ **No extra work:** We take care of the CO₂ calculation, offsetting and provision of the label for you.
